Azaleas \$35 Per Hundred

20th YEAR

ALL PRICES ARE F.O.B. SUMMERVILLE

Terms are strictly cash with order.

No C. O. D. Shipments made.

Minimum Shipping Order \$5.00.

No guarantee with plants except that they are true to names as I know them.

Some varieties of both Azaleas and Camellias are being added and some dropped each year. Also stock of Camellia Sassanqua is being increased.

Plants packed in very light, but strong crates, for less expense to customers. Many letters of commendation on crating methods each year.

Smaller sizes of Azaleas are wrapped 5 or more to a bundle. Order these sizes in multiples of five of a variety.

NO CHARGE FOR PACKING

Because it is best to move Camellias and Azaleas in fall or early winter, I advise early ordering.

Stock is very limited in some varieties.

SPECIMEN PLANTS

THESE ARE STRONG GARDEN GROWN

(NOT FIELD GROWN) PLANTS

All plants are high quality; with junctions well healed over in grafted plants, and with extra fine root systems, which will come to you almost intact out of rather sandy soil. They should do well in any soil in which they are placed, without removing the burlap.

Each plant is inspected before it goes out, so that no weak or diseased plants should get by. Every plant should be good for its class.

If you like the plants, please recommend them to your friends.

Write for information on any varieties in which you are interested, whether listed or not.

A Z A L E A S

Azaleas from the Allan Nursery have been widely known for quality and strength of their root systems for years. This year, for the added convenience of my customers, there are listed below most of the varieties in stock in quantity.

Each year more new varieties will be added from the introductions of other nurseries and also from my own seedlings, of which Eleanor Allan is the first of quite a few very fine ones.

INDICA AZALEAS

CRITERION—A very beautiful variegated flower in a compact plant. Late. Hardy.

DUC de ROHAN—About the color of Pride of Summerville but a stockier plant. Midseason.

ELEGANS—(Early Pink.) Not very hardy but a fast growing, beautiful variety. Early.

EARLY SALMON—This is similar to Elegans but the flowers are light Salmon. Early.

FISHER PINK—Similar in growth habit and blooming period to Pride of Summerville but the flowers are clear pink. Midseason.

FIELDERS WHITE—Well-known, early mid-season white.

FLAME (President Clay)—Well-known hardy and fast growing Flame Red. Early Midseason.

FORMOSA—Fastest growing and one of the most satisfactory of the Indicas. Midseason.

GEORGE LINDLEY TABOR—Hard to describe, but a most beautiful variegated flower of large size on plants of good vigor. This variety has gained in popularity steadily since it was first put on the market. Midseason.

GEORGE FRANC—An old standby with huge flowers of deep pink with a deep rose throat. Early.

GULF PRIDE—Medium-sized flowers of the most beautiful shade of Lavender. Early Midseason.

JERSEY BELL—One of the famous Pericat Hybrids that has many qualities of the Indicas but with medium sized hose in hose flowers of salmon pink. Fast, compact grower. Midseason.

INDICA ALBA—Early, tall and hardy White.

JUDGE SOLOMON—This wonderful Azalea should be listed in a class by itself, because it is a true sport of Formosa with huge Pink flowers. It has all of the many wonderful

qualities of Formosa plus the fine color of the Pride of Mobile Azalea. This variety is almost bound to become the most popular Indica variety.

LILACINA—Very large flowers of a soft lavender shading deeper at the throat. Hardy and tall. Likes a moist location. Much admired. Early Midseason.

MRS. L. C. FISHER—Another of the Pericat Hybrids, with many characteristics of the Indicas. Deeper flower than Jersey Belle, but similar. Foliage is very dark, shiny and narrow like the Macranthas. Midseason.

PRIDE OF SUMMERVILLE—One of the very best and most reliable of our Southern Azaleas. Very hardy and a fine performer. Soft Salmon Pink color. Midseason.

PRIDE OF MOBILE—One of the most popular varieties along the Gulf Coast, but a little tender north of that section. Possibly the variety Judge Solomon will replace it in popularity in colder climates. Early.

HYBRID OF UNKNOWN ORIGIN—This variety has large hose in hose flowers of a wonderful shade of light pink. Reasonably hardy, sturdy growth and bell-shaped beautiful flowers. Identified as No. 72 here, it is very much sought after by visitors to the Nursery.

Prices of the above Azaleas, except Criterion Judge Solomon, Lilacina and No. 72. Add 15c per plant for these four:

	Each	Per 100
10" in height-----	50c	\$40.00
12" in height-----	75c	60.00
16" in height-----	\$1.00	75.00

Larger sizes in some varieties.

KURUME AZALEAS

APPLE BLOSSOM—Strong, hardy, fine bloomer with glossy foliage and beautiful Salmon and White flowers.

CORAL BELLS—Very bushy plant with foliage like Boxwood. Small flowers in clusters are coral pink. Wonderful for borders.

COPPER BELLS—Similar to Coral Bells in many respects but color of flowers is Orange copper.

ELEANOR ALLAN — With due humility, the finest Pink Kurume. This is a seedling of Hinodigiri and resembles it in growth habit and performance but flowers are a most beautiful glowing pink. Every Nurseryman who has seen it has ordered a supply.

HINODIGIRI—Still the most popular red.

PAINTED LADY—A Dwarf variety with white flowers speckled and streaked with red. This is a very pert and saucy little Azalea. Hard to propagate and slow to grow, but makes a beautiful plant with glossy foliage and very compact habit. Branches sporting solid color may be removed to retain the effect.

PEACH BLOW—A fast growing and lovely soft Salmon Pink that will grow to eight or ten feet in favorable circumstances. Heavy bloomer and most satisfactory.

SALMON BEAUTY—Bushy but strong growth, with shiny foliage and a profusion of very large (for Kurume) flowers. One of the best of the Kurumes, and very widely used by florists for forcing.

SNOW—Probably the best White Azalea for all purposes. Grows fast, very shiny and good foliage, and very dependable with a profusion of fairly large hose in hose flowers. Use it in borders or in your group plantings of either Kurumes or Indicas and it is outstanding.

Prices of the Kurume Azaleas, with the exception of Painted Lady. Add 20c each for this variety.

	Each	Per 100
8" spread -----	50c	\$40.00
10" spread -----	75c	60.00
12" spread -----	\$1.00	75.00

Larger specimens available in some varieties

CAMELLIAS

OWN ROOT CAMELLIAS

All of these plants are three or more years old, and are not graded by height alone, so no sizes are listed. One variety may be only 12" tall, but be bushy enough to be worth as much as a 24" plant that is spindly. They are grown for root strength and will have it.

Name of Variety	Price Range
Mathotiana -----	\$4.00 to \$12.00
Mathotiana Var.-----	5.00 to 10.00
Duchess of Sutherland -----	4.00 to 6.00
Debutante -----	4.00 to 7.50
Prof. Sargent -----	5.00 to 7.50
Pink Perfection -----	3.00 to 7.50
Elegans -----	3.00 to 5.00
Mrs. Walter Allan -----	7.50 to 10.00
Pearl Harbor -----	4.00 to 6.00
Rev. John Bennett -----	3.00 to 5.00

Please do not compare these prices with those of Nurseries that force their plants to 18" growth in one season.

Many other varieties in various sizes but too few to list.

FIRST OFFERING

Finest Varieties of Camellias 50c to \$1.00 Each

This year for the first time I am offering Camellias grown in quart cans. These plants have had a full season's growth in these cans and have wonderful root systems because the soil is very porous and they are fed minute quantities of fertilizer all summer. They are in fine shape and will run from 6-8" tall to 10-12". Many of them are also branched.

In planting these plants I strongly recommend that they NOT be removed from the cans in which they now are growing because some roots will be broken if they are. The best method seems to be to PUNCH six or eight holes around the sides of the can well above the bottom and allow the roots to grow through these. The cans are

thin metal and will rust out completely in a couple of years or less. The same method may be used in repotting in larger containers. Mulch will hide the can rims. Punch with beer can opener.

Prices of these plants in cans run from 50c each to \$1.00 each depending on variety and on size. Write up your order and send it in without money and I will advise the nearest manner in which I can fill it and will advise prices then.

However you intend to use these plants you will like them. They make wonderful presents.

CAMELLIA SASSANQUA

Camellia Sassanqua Cleopatra has been found to be one of the very best for understock purposes and I am glad to be able to offer this fine variety in extremely bushy plants for this pur-

pose or for specimen use. This variety also makes a very fine and dense hedge. Quantity prices allowed.

Sizes from 24" to 48" and liners.

Plants of Rosea and Minnenoyuki as well as other varieties available in quart cans.

- the Cherokee Roses in Galton Cane \$2.50

CAMELLIA SEEDLINGS

Listed below are some of my Camellia Seedlings:

Katherine Allan: 4-5 inch bloom of an exquisite soft pink. Fast, strong growth. Foliage like Alba Plena but larger. Large flower in December to February, with flat outer petals and a mass of beautiful fluffy petaloids in the center. Not on market yet.

James Allan: 4 to 5 inch bloom opening from a large bud to a flat almost single to twenty or more petals, Semi Double. Firey Red with many flaring and prominent golden stamens. A beautiful and showy flower which lasts well on plant or cut. Strong grower.

Mrs. Walter Allan: A large Semi Double flower, 4-5 inches, with prominent stamens showing from flowers, sometimes pendent, sometimes erect. Very strong and upright but rather slender growth in grafted plants. Color, clear rose red. Extremely long lasting flowers.

Glenn Allan: A huge and beautiful regular semi double deep rose red flower on a compact and slow plant that is extremely strong and upright. Beautiful round, dark and glossy foliage. Long blooming season with largest blooms late in season.

Henrietta M. Allan: A full double imbricated medium sized, clear pink, with some stamens sometimes when wide open. Many petals. Compact grower. Good foliage.

Grace Hutchinson: Fully imbricated, deep rose, with many petals fading lighter at the center. Compact, strong growth. Fine foliage.

Dr. H. G. Mealing: A very large blood-red heavy SD flower, opening from large buds rather late in season. Petals are heavily veined and have distinctive character of formation. A strong grower and good bloomer. Dark rounded foliage.

NEW ALLAN SEEDLING AZALEAS

Eleanor Allan: Fast becoming a best seller. Pink flowered seedling of Hinodigiri. Very vigorous and very heavy bud set. The Best Pink Kurume. Early.

Catherine Stewart: A hybrid with hose in hose (double) flowers of Royal Purple. Truly a beautiful flower and a strong grower and heavy bloomer. It blooms in early midseason.

Pride of Kingstree: Early Midseason hybrid with single pink flowers of medium size. Hardy plant and extremely hardy flowers which frost damages much less than other Azaleas. This variety was selected from over 100 new seedlings by a Committee from the Town of Kingstree for their Town's namesake.

Mrs. P. F. Smith: Early Midseason white slightly washed lavender pink. The color is so delicate that at a distance the flowers appear to be white. Compact strong grower and hardy.

No. 535: Extremely fast growing variety with single brick red flowers of medium size. The best points of this one are its rank growth, hardiness and the fact that flowers do not fade as so many of the brick reds, including President Clay or Flame, do. This is a fine one.

Prices on all of the above:

8-inch spread	-----	\$1.00
10-inch spread	-----	1.50
12-inch spread	-----	2.00

Quantities Limited On All.
